Frederik VIII reigned for only six years, from 1906 until 1912. He and Lovisa spent four decades as Crown Prince and Crown Princess, and this presented them with some special challenges, not least as regards their relationship with the rest of the royal family, which was strained. In several ways Frederik and Lovisa were individuals whose behaviour was at odds with previously existing patterns, and neither the Danish royal family nor the public always viewed this in a positive light. In his efforts to meet the populace on its own terms, Frederik VIII became too folksy in the eyes of many contemporary Danes. The book is part of the Crown Series, a series of small books on the Danish monarchy and related subjects published in cooperation with the Royal Danish Collection. The book is written by Jens Gunni Busck.
